

Rajiv Ranjan

Backend Engineer | Java, Spring Boot, Distributed Systems

📞 7050588988 ✉ rjrajeev5918@gmail.com [🌐 linkedin.com/rajiv-ranjan256](https://www.linkedin.com/rajiv-ranjan256) [🐙 github.com/rajeevrj256](https://github.com/rajeevrj256)

Education

Vellore Institute of Technology (VIT), Bhopal

B.Tech - Computer Science and Engineering (GPA: 8.14 / 10.00)

Sep 2021-May 2025

Bhopal, MP

Experience

Software Development Engineer 1

Aug 2025 – Present

Brick & Bolt

Bengaluru, India

- **Optimized PostgreSQL queries on 13M+ records** using **indexing and batch processing**, reducing query latency by 40%.
- Built **Kafka-based pipeline for asynchronous call auditing**, enabling **scalable processing of high-volume data** and **improving lead qualification rate** by 55%
- **Resolved third-party API failures** caused by **load balancer timeouts** by **analyzing Grafana logs** and implementing **custom HTTP client configuration with keep-alive strategy**, improving request reliability
- Implemented **scheduled data ingestion using cron jobs** to fetch call data from Goodmeeting.ai APIs for downstream processing.
- Leveraged **AI coding assistants (Claude/Codex)** to generate APIs, test cases, and **refactor code using structured prompts (skill.md)**, ensuring production-grade quality through validation and review.

Software Development Engineer Intern

Apr 2025 – July 2025

Brick & Bolt

Bengaluru, India

- **Improved API response time from 1000ms to 200ms** by optimizing **PostgreSQL queries** and **introducing caching**, enhancing system performance under growing data load.
- **Developed 10+ REST APIs using Spring Boot** to manage subscription plan configurations, **enabling real-time updates by business teams** and reducing manual engineering dependency.
- **Refactored legacy Java components**, improving **code maintainability** and **reducing production bugs** by 25%.
- Integrated **AWS S3 and CloudFront** for banner management, enabling dynamic updates via static URLs and **reducing backend load and frontend network calls**.

Projects

Crypto Price Alert App | *Flask, RESTful APIs, MongoDB, Binance API, Docker, SMTP*

- Built a **real-time price alert system** using **WebSockets and SMTP**, enabling instant notifications and reducing manual monitoring effort by 40%
- Designed a **containerized backend using Docker** for **scalable data processing and deployment**, improving **system reliability and performance**

AI-Powered Database Query Assistant | *React.js, LangChain, RAG, Python, OpenAI LLM, NLP, SQL, RESTful APIs, Redis*

- Designed a **real-time NL-to-SQL system** using LLMs, enabling users to **generate, execute, and retrieve query results** across PostgreSQL and MySQL databases
- **Designed 16+ REST APIs with Redis caching** to reduce redundant queries and improve response time by 30% under concurrent load

AI-based Product Content Generation System | *React.js, Node.js, AWS, RESTful APIs, Firebase, Docker*

- Built a **backend system to process multimedia inputs** (audio/image) using AWS Transcribe and generate product descriptions using LLMs for e-commerce workflows
- **Designed REST APIs with user-level data isolation and product management**, supporting **multi-tenant usage and secure access control**

Technical Skills

Languages: Java , C++ , Python , SQL

Backend & Frameworks: Spring Boot, Git, Kafka ,Redis

Databases: PostgreSQL, MongoDB
